

# codettes mobile fablab

The Codettes Mobile FabLab is a bus equipped with state-of-the-art tools and technology aimed at inspiring innovation, ICT, and entrepreneurship in students. The project was developed by Codettes in partnership with Chevron and Paradise Oil Company – a subsidiary of Staatsolie.

A pilot project was implemented in the districts of Paramaribo, Nickerie, Coronie, Jaw Jaw and Marowijne, primarily attending women living in the indigenous and rural areas. Recently, the project was redesigned to meet boys and girls in other districts. The expectation is to benefit around 100 students in the coming years.

At this social project, Chevron and Paradise Oil Company invested in the acquisition of a Van and machines - as a laser cutter, 3D printers, mini-CNC machine, embroidery and crafting machines, and electronics workbench - for manufacturing equipment and holding workshops. Our support also included visual identity of the vehicle to convey the innovation and education proposal ideas
